Re: DeNeve Construction

We have had the pleasure of using DeNeve Construction several times during the past year and have been completely satisfied with their workmanship and performance, and would recommend their services to anyone so inclined. Our experiences have included the following:

- Added R16 insulation in attic.
- Installed new 30-year shingles on roof, which entailed a complete tear-off plus new ridge vents. Installed vent fan in bathroom.
- Remodeled kitchen, including new ceiling, new countertop, new sink and faucet, and new vent fan over stove.

For each project, a clear estimate was presented prior to starting, the job was finished in the time stated and per the estimate quoted, and all materials and scraps were removed upon completion.
